

Meeting place at the Märklin stand, Intermodellbau: smart models and superb layouts for all to enjoy – and for Club members a little memento of the exhibition.

EXHIBITION DORTMUND 2014

# New products on show at Intermodellbau

**A**t the 36th Intermodellbau in Dortmund from 9 to 13 April 2014 two halls are reserved for the top theme of model railroads. Märklin with its many attractive new products and exhibition layouts in various gauges will enrich Hall 4 (stand 4.A36); this is where the 2014 Club models make

their big entrance. For layout enthusiasts, a stroll through the Westfalenhallen in Dortmund will be well worth while: around 40 model railroad layouts from all over Europe will be on show, many for the first time. In Halls 3A to 8 at Intermodellbau all possible aspects of model construction will be presented with all the accessories. Times of opening: 9:00 to 18:00, Sunday to 17:00. Travel from Dortmund

main station to the stop “Westfalenhallen” with subway line U45, or from Dortmund City with the U46.

For Intermodellbau Märklin is again producing the popular special cars. This year in Z-gauge, it is the Eaos 106 open freight car with a load insert of “rusty scrap” (item 80724). For H0 followers, it’s a type Ibdlps 383 refrigerator beer car (item 48634) – as a car privately owned by the Brauerei Kronenburg, registered with the DB. Both these cars are produced in a one-off series and will only be available during Intermodellbau from retailers at the exhibition and in Dortmund. //

Special cars: Refrigerator car in H0 (left) and Eaos gondola with a load insert of rusty scrap in Z gauge.

## Benefits for Club members

For Club members, there is a substantial discount on the price for day admission to Intermodellbau Dortmund. To get this benefit, simply enter the code **IB2014Maerklin** in the online shop under the Internet address [www.intermodellbau.de](http://www.intermodellbau.de) – please observe capitalization. Then print out the so-called

Print@Home entrance ticket. Instead of the regular price of 11.50 euro for the online day ticket, Club members only pay 9.50 euro. And the Print@Home entrance ticket has another useful advantage: the time-consuming wait at the day pay-booths is no longer necessary.

**On presentation of their Club card at the Märklin stand, Insiders will receive an exhibition memento.**

## MIST 72 runs on a line almost 240 meters long

Fascination without equal: The long trains run by MIST 72 attract rapt attention.

The second Long Train Event by MIST 72 again gave rise to wide-eyed wonderment from the visitors from the Reutlingen/Tübingen region. On the "Day of the long

In demand: Intensive perusal of the Märklin brochures and the copies of Club news laid out.

track-runs", the Märklinists sent out some fabulous trains, like the ore train "long Henry" with 42 cars, the class 120.1 with giant transformer low-loader cars, the lightning-fast ICE and the "Big Boy" with an almost unending string of freight cars behind it. The two-day spectacular, put on by the 20 Insiders, adroitly wakens emotions, as everyone can run their treasures either on digital or analog control. The total length of run has grown to an immense 239 meters (784') (2013: 168 m – 551') with

1,255 (698) pieces of track. Control cables and wiring are professionally concealed under the wood floor. "The fascination can thus be devoted entirely to the models and the running", comments round table spokesman Horst Bossler on the work done by MIST 72. "It's very much appreciated that we present Z-gauge, gauge 1 and LGB as well as N-gauge and the Faller Car System including layout construction specialty; that means all aspects of the world's greatest hobby are seen in one place".

## Model range 2014 brilliantly received

The Märklin new products for 2014 harvested high praise at both the International Toy Fair in Nuremberg and at Faszination Modellbahn in Sinsheim. The Club models 2014 in particular were well received by the trade in Nuremberg, and model railroaders in Sinsheim gave a very warm welcome to the E 93 07 (item 37870) and its two freight car sets (46199/47321) in H0 and the class 64 (88740) with its "Thunderboxes" (87509) in Z gauge. Retailers in Nuremberg were also delighted with the appealing trade fair locos by Märklin: a dual pack with the popular electric locos 103 003-0 and 120 003-0 of the DB in H0 (31014) and Z gauge (88179) in very special color schemes. Märklin always presents an unusual model to trade visitors at the toy fair in Nuremberg. This year they received an exclusive type Ichqrs 377 refrigerator cars celebrating the 825th anniversary of the port of Hamburg.

Tempting: Only retailers at the trade fair were able to order the dual pack with electric locos class 103 (top) and 120 (above) in H0 and Z.

Trade visitors were delighted with the Ichqrs refrigerator car in Z-gauge.

## And another round table: MIST Lüp

A new Insider round table now meets in Übach-Palenberg, to the west of Jülich: MIST Lüp (Märklin Insider Stammtisch Liebhaber Übach Palenberg). "We hope to have plenty of visits from our Netherlands model railroad friends", says founder member Detlef Kochs, who also welcomes Trix enthusiasts.

Monthly meeting place is the restaurant "Postwagen" in 52531 Übach-Palenberg, Bahnhofstrasse 25, Germany  
Contact: Detlef Kochs,  
Tel.: +49 (0) 1 72/992 20 89,  
detlefkochs@t-online.de

You will find the current list of all Insider round tables online in the Club area under [club.maerklin.de](http://club.maerklin.de)
